- GitHub desktop
- Clone a repository
- URL

The screenshot shows the 'Clone a repository' dialog box in GitHub Desktop. It has a title bar with a close button (X). Below the title bar are three tabs: 'GitHub.com', 'GitHub Enterprise', and 'URL'. The 'URL' tab is selected. The main area contains the text 'Repository URL or GitHub username and repository (hubot/cool-repo)' above a text input field with the placeholder 'URL or username/repository'. Below this is a section for 'Local path' with a text input field containing 'C:\git' and a 'Choose...' button. At the bottom right are 'Clone' and 'Cancel' buttons.
